Our Vision

To be the indispensable choice of manufacturers and end users in the plastics industry.

Our Mission:

To be a significant player in the plastics industry by providing the best products and services with strong capacity and the total participation of all employees; to create customer loyalty, generate profit for our stakeholders, and to adhere to environmental values that ensure energy efficiency.

QUALITY POLICY

We believe that quality is a process that needs to be continuously developed and sustained rather than a goal to be achieved. Our quality management system, which is based on the internationally accepted ISO-9000 standards and ensures the continuity of this process, is itself being continuously developed in accordance with the conditions and technology of the time.

- It is to ensure the highest level of customer demands, to continuously improve product quality and to carry out cost reduction studies with the participation of all our personnel.
- For a customer-oriented system, efficiency in intra-company relations is important. Therefore, the most important communication factor in our business is to provide a “family environment”.
- Employees’ commitment to the institution is a part of our effective management system.
- To work with our suppliers and subcontractors in mutual cooperation and trust and to increase our efficiency.
- To continuously improve all processes that affect the success of our company and the quality of our products.
- To increase the individual contributions of our employees through continuous training.
- With the awareness of responsibility towards the environment and society; To be a leading organization in its sector in terms of technology and quality.
